### Our Mission

GlasWeld is dedicated to providing the most efficient and highest quality solutions to the worldwide glass repair and restoration industry.

From both an ecological and economic perspective, the restoration of glass offers an invaluable option to replacement and is not only on a growth curve in the United States but worldwide.

We strive for continuous improvement in all we do, including service, training, consulting and customer support while working to have a positive impact on the environment.

# The history of **GlasWeld** is tied up in the very history of **Glass Repair** itself.

Since our inception we have strived to be the industry leader in windshield repair, glass scratch removal, headlight repair, and other glass restoration solutions worldwide.

The glass repair industry first began to gather momentum in the early 1970s. During this time, Hap Alexander trained in the new art of glass repair and saw ways to improve

methods and equipment. He went on to develop proprietary products to advance glass repair quality and began performing repairs with his new system in 1978. In 1982, he founded a glass repair company—**GlasWeld**, which quickly became an industry leader through its extensive research and development in the field of glass repair and glass protection.

## Windshield Repair

From the start, GlasWeld has continually worked to develop and patent the very best windshield repair equipment available on the market. These products include the industry's first tinted resins, several generations of technologically advanced **ProVac™** injectors, and a full line of LED UV curing lights.

- ▶ Manufacturer and distributor of glass repair equipment and restoration services since 1982.
- ▶ Cost efficient and ecologically sound alternatives to glass replacement and disposal.
- ▶ Our strength lies in the dedication, experience and expertise of our people.
- ▶ We are proud of our long-standing relationships with our customers and distributors.

## Glass Scratch Removal

In 2003, GlasWeld expanded its offering in glass repair by developing **Gforce™**—a system that removes scratches on glass surfaces from nearly all types of glass. Through independent testing, it has been proven to remove these scratches with no distortion.

## Headlight Restoration

In 2011, GlasWeld introduced the **Gclear™** Headlight Restoration System. This system restores polycarbonate headlight lenses and features a wipe-on OEM UV Coating and UV Curing Light which provides a long lasting, durable finish comparable to what comes from the original factory.

Today, GlasWeld has representation in more than 50 countries around the world, and boasts some of the glass industry's top names on its client list.

## GlasWeld windshield repair means **quality repairs.**

Did you know that GlasWeld has the highest quality windshield repair kits and can be used in all weather environments?

Not all repairs need to look like they were simply filled with some kind of glue and left to dry. Done correctly with GlasWeld products, windshield repair will not only look seamless, it will keep the windshield intact.

The GlasWeld repair process involves removing all air from the damage, injecting it with a UV curable resin, and then curing this resin with a UV curing light. This process keeps the damage from spreading and keeps the repair as close to invisible as possible.

When starting or expanding your business to include auto glass repair, look no further than GlasWeld. Our innovation in auto glass repair equipment, service, and training will ensure your success for years to come.

The G3 ProVac Injector and the ProCur2 LED UV Curing Light provide exceptional repair results.

### The Choice of Champions

*We are very proud that in three of the last four Windshield Repair Olympic competitions, GlasWeld Certified Technicians have won 1st Prize.*

- ▶ Braulio López from Spain wins gold at the 2013 Windshield Repair Olympics using GlasWeld equipment.

## STEP ONE: choose your injector

**GlasWeld** has two different injectors, the **ecoVac™** and the **G3 ProVac™**. The ecoVac is simple and easy to use. The G3 ProVac will automatically isolate the resin and remove the moisture without having to perform an extra step. They are both fantastic injectors—we'll leave the choice to you.

ecoVac™

### Stainless Steel Injector

GlasWeld offers a windshield repair injector at an attractive price point so more technicians can take advantage of its technological benefits. This injector can handle most types of windshield damage extremely well. It is built to last and is easy to use.

- Uses only 4 drops of resin per repair
- Self-contained; no external pumps or hoses
- Stainless steel with a lifetime warranty
- Uses patented ProVac technology

First Place 2011

First Place 2010  
Second Place 2011  
First Place 2013  
Second, Third Place 2014

G3 ProVac™

### Stainless Steel Injector

Our G3 ProVac Windshield Repair Injector has been designed for professional glass repair technicians. The culmination of years of research, design and testing, the G3 injector utilizes resin isolation technology to remove both air and moisture from the break in one simple step, making your repair time lightning fast.

- Uses only 4 drops of resin per repair
- Injects resin without air or moisture contamination
- Self-contained; no external pumps or hoses
- Stainless steel with a lifetime warranty
- Uses patented ProVac technology

## STEP TWO: choose a UV curing light

Complete curing of the resin is very important in a windshield repair. The resin needs to be exposed to UV light, at a particular wavelength and intensity. GlasWeld offers a complete line of LED UV lights to fit your curing needs.

**Fast just got faster!** The ProCur2 is GlasWeld's most advanced curing light. It gives a 360° cure in less than a minute and requires no ballast or bulb changing...giving you more time in your day and more money in your wallet.

- Patent-pending 360° cure in less than one minute
- LED technology lasts 10,000+ hours
- No bulbs to change!
- Electronic circuitry —no ballast
- Accepts input from 10 to 30 volts DC
- Produces stronger, better looking repairs
- Lightweight and durable aluminum housing
- **Saves up to five minutes per repair:** which adds up to a savings of more than one hour per day for the average technician

*First Place 2013  
Second, Third Place 2014*

**Cure quick. Cure easy. Cure ALL!** Increase your productivity with advanced LED curing technology. Works with any type of injector on any type of damage—great for cracks too!

- Cures in 3-4 minutes
- LED technology lasts 10,000+ hours
- No bulbs to change!
- Electronic circuitry —no ballast
- Accepts input from 10 to 30 volts DC
- Lightweight and durable aluminum housing

**Easy and portable curing.**

This battery-operated spot curing light utilizes LED technology to emit an intense ultraviolet wave pattern at just the right frequency for curing resin. Cures in 3-4 minutes.

## STEP THREE: learn about resins

Choose the best windshield repair resin, tailored for each type of damage, to ensure your customers receive the best results possible.

### Gfusion Resins are:

- Scientifically formulated to ensure clarity, quality and strength
- Independently tested to meet and exceed national and international industry standards, including BSI, ANSI and the NWRA (National Windshield Repair Association)
- Created to perfectly match different temperature and break combinations
- Developed to work seamlessly with the components of all GlasWeld windshield repair kits
- Available in a variety of tints and viscosities for every type of damage

GlasWeld's Gfusion resins deliver consistent repair results—every time!

### Extreme damage?

*The Gforce2 Extreme System is designed to remove almost any type of damage, from simple rubs to heavy graffiti with minimal distortion. See our abrading modules on page 16 to upgrade your current system.*

◀ Before, during and after using the Gforce2 Extreme System.

## Gforce<sup>™</sup> Essential

### Glass Scratch Removal System

- Repairs light to medium damage quickly with no distortion
- Entry level polishing system
- Ergonomic, durable polishing machine with built-in GFCI
- Patented technology
- One year warranty
- Online training, DVD and manual

*Optional equipment:*

*Upgrade to a Water Feed System for precision polishing*

*Add an abrading module (see page 16) to handle all types of damage.*

## Gforce<sup>2</sup><sup>™</sup> Essential

### Glass Scratch Removal System with Center Water Feed

- Repairs light to medium damage quickly with no distortion
- Proprietary Center Water Feed System for pinpoint accuracy
- All the professional tools needed for effective scratch removal
- Ergonomic, durable polishing machine with built-in GFCI
- Patented technology
- One year warranty
- Online training, DVD and manual

*Optional equipment:*

*Add an abrading module (see page 16) to handle all types of damage.*

## Gforce<sup>™</sup> Standard

### Glass Scratch Removal System

- Repairs light to medium damage quickly with no distortion
- Complete system for polishing
- Water Feed System
- Ergonomic, durable polishing machine with built-in GFCI
- Patented technology
- One year warranty
- Online training, DVD and manual

*Optional equipment:*

*Add an abrading module (see page 16) to handle all types of damage.*

## Gforce<sup>2</sup> Professional Glass Scratch Removal System with Center Water Feed

- Repairs light to heavy damage quickly
- Complete system for polishing and clearing
- Center Water Feed for pinpoint accuracy
- Ergonomic, durable polishing machine with built-in GFCI
- Twice the consumable supplies of our Gforce Systems
- Ballistic-grade, high-impact case with custom foam
- One year warranty
- Online training, DVD and manual

*Optional equipment:*

*Add an abrading module to handle all types of damage.*

## Gforce<sup>2</sup> Extreme Glass Scratch Removal System with Center Water Feed

- Repairs light to extreme damage
- Our most complete system to address ALL types of glass damage
- Center Water Feed for pinpoint accuracy
- Ergonomic, durable polishing machine with built-in GFCI
- 60, 5" abrading disks in 6 different grits
- 10, 3" abrading disks in 2 different grits
- Twice the consumable supplies of our Gforce Systems
- Ballistic-grade, high-impact case with custom foam
- One year warranty

## Gforce™ & Gforce<sup>2</sup>™ Abrading Module Kits

Our Gforce Abrading Modules are designed to enhance your Gforce glass polishing system.

GlasWeld's glass abrading (sanding) process has been field-tested and proven to remove major glass damage caused by scrapes, graffiti, acid damage, welding and atmospheric etching.

GlasWeld's scratch removal and abrading kits allow you to efficiently remove medium to extreme glass damage.

**Gforce™ Glass Abrading Module**

**Gforce™ 3" Abrading Module**

**Gforce™ 5" Abrading Module**

### Polishing Compound

Remove scratches without distortion. This specially formulated, non-abrasive polishing compound removes the scratch, not the glass. Each jar contains .250 kg of Polishing Compound.

### Clearing Compound

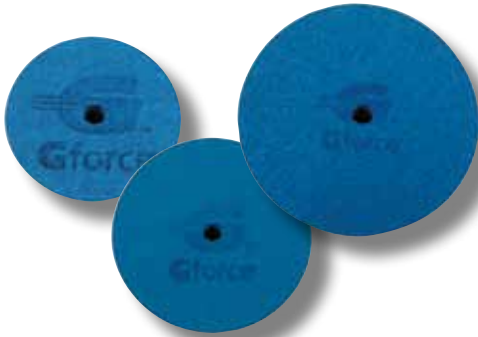

Restores the clarity of abraded glass more rapidly than our Polishing Compound, giving you a clean, clear result. It is specially formulated with mild abrasives to speed up the clearing process by more than 20% over polishing compound. Each jar contains .250 kg of Clearing Compound.

Polishing Disks - 2", 3" & 4"

SIZE	TYPICAL USAGE
2 "	Works well for small scratches, tight areas, corners and close to moldings.
3 "	Great all-around choice for removing scratches in auto glass and architectural glass. Recommended for mirrors.
4 "	A commonly used disk for removing scratches in auto glass as well as architectural glass and spot removal.

Backer Pads - 2", 3", 4" & 5"

Works with all Gforce polishing machines and has a hole in the center for use with the center water feed system. Not all Gforce systems use this center water feed. It does not affect the performance of the backer pad.

Interface Pads - 3"

These foam interface pads ensure smooth, consistent results when abrading glass.

Abrading Disks - 3" & 5"

GRIT	TYPICAL USAGE
100	Our most aggressive abrading disk. Used primarily to remove Heavy & Extreme damage.
180	An aggressive abrading disk. Used primarily for removing Heavy damage.
240	A mild abrasive abrading disk. Used primarily for removing Medium damage.
320	For light/medium damage. Clearing is possible after this "progression step".
400	Used for light damage, including stubborn Hard Water Etching. Clearing is recommended after this "progression step".
600	Used for light damage. Clearing is recommended after this "progression step".

## Clear. Coat. Cure.

Headlight restoration that lasts for years.

Did you know that headlights can be restored to new condition? And the results last for years?

Headlight restoration is a cost effective solution that can return headlights to like-new condition with a quality UV coating and curing process that lasts several years, and keep the old headlights out of our landfills. All while offering you, the service provider, an exceptional profit opportunity for your business.

## Remove water spots and stains **quickly** and **effectively** with proClean.

# proClean™

professional grade  
water spot & stain remover

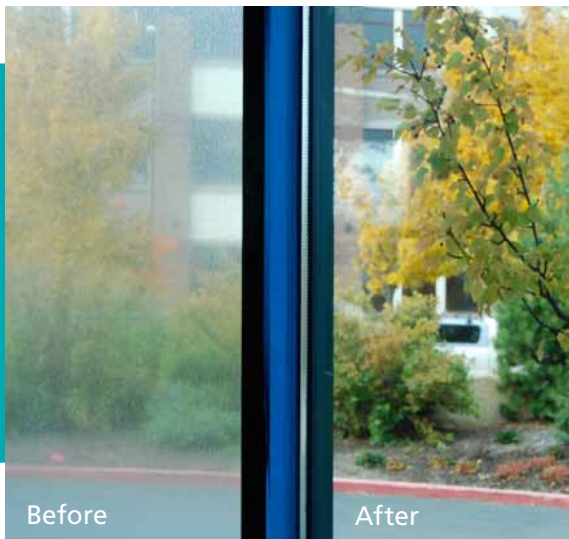

If the glass you're working on has been exposed to outdoor conditions, most likely it has unsightly water spots and stains that can affect visibility. ProClean gives you the ability to restore glass to its original clarity.

ProClean is a biodegradable, non-acid, water-based water spot and stain remover product used on all types of glass surfaces—**commercial, residential, automotive, marine and more.** It is specially formulated to remove:

- Stage 1, 2, & 3 Water Spotting
- Mineral Deposits
- Stains
- Atmospheric Etching
- Environmental Hazing

- Apply ProClean with the Gforce Polishing Machine or by hand with a non-scratch pad.
- Available individually in 8 or 16 ounce bottles or by the case (12/case).

*"This is a far superior product! We have used other products before, but proClean made my co-workers and my life easier. No other products compare to proClean. It made the water spots disappear with little effort and minimal clean up. ProClean covered more windows per bottle and worked better, making the windows that needed to be replaced look like new again! We will use it again and would recommend it to anyone with hard water spots."*

**Peter Shanks, White Oak Construction**

◀ The image left shows Before and After cleaning the windows at the Deschutes Brewery headquarters in Bend, Oregon.

No other manufacturer in the glass repair industry can supply you with the **training options** and quality of GlasWeld.

- ▶ 24/7 Online Video Training via Gconnect.
- ▶ DVD Training and comprehensive Operations Manual included with every system.
- ▶ Free hands-on training available at GlasWeld's headquarters in Oregon
- ▶ Competent Technical Support available through your GlasWeld representative.
- ▶ Certified Windshield Repair Technician program available.

Without proper glass repair training and education no glass repair technician is fully equipped to do their best. **We will help you to succeed!**

From world-class online glass repair training, to first-rate hands-on training, GlasWeld can meet your educational requirements.

For our **windshield repair customers** we offer you the chance to become a certified technician (which gives you a number of benefits—not the least of which is an annual **15% OFF discount** through our ProClub) through our cutting-edge Gconnect online glass repair training.

For our **scratch removal and headlight restoration customers**, we offer the cutting edge Gconnect online glass repair training, which helps you master the processes involved. We can also train you on-site to help you master the “art” of glass scratch removal and headlight restoration.

# Promote your business

with marketing products from GlasWeld.

Our award-winning team will deliver compelling glass repair marketing materials customized with your corporate identity and contact information.

We realize you may not have the resources to staff your own marketing department or the time to create compelling glass repair marketing campaigns by yourself. What you need is a marketing department that you can work with on an as-needed basis that understands the glass repair business like no other. You need GlasWeld's in-house marketing team.

From brochures and point of purchase displays, to radio, television and print advertising, billboards to vehicle graphics and more... we can supply you with materials to build your brand and your business.

Don't see what you need? We can create a custom campaign exclusively for you. Just give us a call to discuss your ideas. Have a suggestion for a marketing product? Let us know. The GlasWeld team is ready to help with all of your glass repair marketing.

- ▶ Professionally developed marketing materials customized for your business.
- ▶ Award-winning team of marketing professionals on staff.
- ▶ Print, radio and television advertisements.
- ▶ Postcards, rack brochures, flyers, mirror hang tags.
- ▶ Billboards, signage, posters, banners and more!
